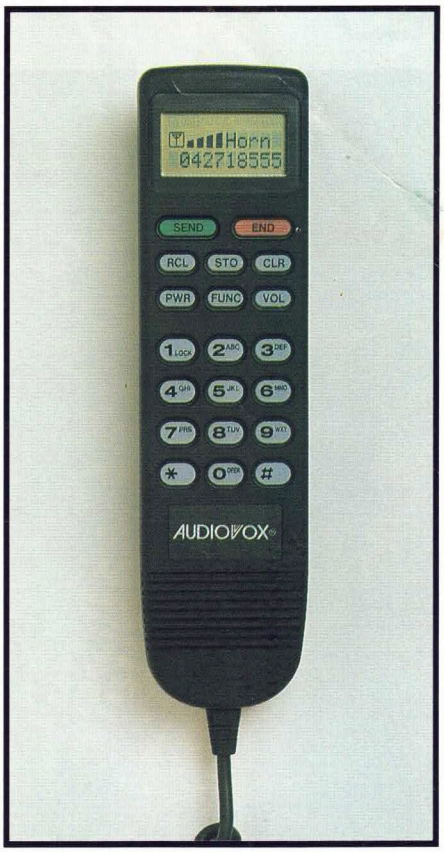
AUDIOVOX® NEXT GENERATION TECHNOLOGY



BC-65 In-car Transportable Mobile Phone

ADVANCED TECHNOLOGY • TOTAL VERSATILITY

Audiovox introduces the BC-65 Cellular Mobile Telephone. This fifth generation phone combines advanced technology with total versatility. Sleek styling complements the wide array of features that have made Audiovox a leader in the cellular industry.

The BC-65 features a new lightweight transceiver; 30% lighter than previous models. The BC-65 has an Auto Answer feature that automatically answers the phone after the second ring, so you can talk to the calling party without touching the handset (in the Hands-free mode), and Automatic Number Storage which eliminates the problems of accidentally writing over a previously stored number, by storing the numbers in the first vacant memory location.

In addition, the BC-65 cellular car telephone offers an outstanding array of enhanced features such as Push-button On-Hook Dialling that enables you to dial while the handset is in the cradle; Repertory Dialling that lets you store and re-call up to 50 numbers and Last Number Redial that permits you to redial the last number you called at the touch of a single button (a great help when calling frequently busy phones).

The flexible mounting system allows the phone to be installed in a second vehicle with the addition of the optional second vehicle installation kit.

For all its high tech sophistication, the Audiovox BC-65 Cellular Telephone is surprisingly easy to use; with its built-in Function Review Menu, you can review at the touch of a button what keys to use in order to access the many different features.

Audiovox backs this outstanding phone with the strongest customer support in the industry.
3 Year Limited Warranty.
